### Nude Pictures On Exercise Books

Sir,

Strange though it may seem is a fact that now-a-days many exercise books are being sold in the market covered with the Pornographic title-page removed from the old magazines. These are frequently being carried by the innocent school going children particularly between the ages of six and eight and the tendency of carrying the same is higher in the case of older children in a concealed manner for discussion in a secret place. They assemble there for amusement over these pornographic pictures which will create a bad taste among these children who may be yours, ours and theirs.

It is beyond my expectation how the exercise book binders could have adopted such a formula without thinking a little about the bad impact it is likely to have on the character of the innocent children. Though they are doing this with the intention of making profit and for business purposes, ultimately the nation will have to pay heavily in the future. So the producers should refrain from doing this for the sake of our future generation and not to indulge in this act in the name of business.

I, therefore, request the concerned authorities to look into the matter and deal with these producers with an iron hand for the betterment of the nation.

Imtiaz Ahmed Siddiqi, Naya Bazar
