Mymensingh Medical College

Sir,

Mymensingh Medical College had been closed on October 2, '89 due to some disturbances. It has not re-opened since. We feel ashamed to be introduced to outsiders as students of Mymensingh Medical College.

We ourselves admitted into this Medical College to become doctors. After taking admission we used to tell others with pride regarding our future career. But as ill luck would have it, we are now disheartened and frustrated due to this unusual situation. The pity is that no other Medical College in the country had closed like ours.

We had a desire to serve our family as well as society after passing the MBBS examination in time. Five years have already clasped but we still remain as students of 4th year class. It may be mentioned here that the students of our session in BUET and BIT have completed their academic courses and some of them are now in service or are getting higher education.

But we are lagging behind for no fault of ours. We appeal to the college authorities and the Health Ministry to arrange for the re-opening of the Mymensingh Medical College as quickly as possible.

Nurjhan, 4th year MBBS, Mymensingh Medical College.
