Examinees in DU science faculty observe partial strike

Varsity Correspondent

The Dhaka University authorities on Tuesday warned the demonstrating honours final year examinees of science faculty saying that if any untoward incident takes place on the campus centering the strike called by those section of students, the authorities would take action against them as per the proctorial rules of the university.

Meanwhile, on the first day of the three-day strike on Tuesday almost half of the classes of the science faculty were not held. Some of the department offices were kept under lock and key by the demonstrating examinees, science faculty sources said.

But the university authorities claimed that all the classes and examinations at the science faculty were held as usual. The authorities advised the students not to become confused by the publicity of the demonstrating examinees; rather they should attend classes, says a press release of the university.
