Medical College At Faridpur

Sir — We are very glad to know that the Govt. has decided to establish two more Medical Colleges in the country, one of them will be reportedly set up at Sher-e-Bangla Nagar, Dacca, and place for the remaining one has not been selected. We the people of Faridpur District express our earnest desire for establishment of the other Medical College at Faridpur.

The people of Faridpur District have been demanding setting up of a Medical College at Faridpur since long.

There is no denying the fact that Faridpur District is most backward in all respects. Little development work has been initiated so far in the District.

Both male and female candidates from Faridpur District hardly get chance for Medical studies at the Medical Colleges of Dacca and other places due to limitation of seats and also for financial inability of the students to defray their expenses during the course of studies at the capital city and other far off places.

Moreover, the establishment of a Medical College at Faridpur will not only provide the people of five Sub-Divisions of the District but also provide the people of adjacent districts of Kushtia, Jessore and Pabna opportunity of health and medical services.

The present popular Government on principle is giving top most priority to develop backward areas of the country and giving due attention to the people who are still deprived of the fruits of development. So, considering the facts and long demand of the people of Faridpur District, we appeal for setting up the remaining proposed Medical College at Faridpur. —Yours etc. SHAM-SUDDIN AHMAD General Secretary, Faridpur Zilla Samity, Dacca.
