Pry schools in Panchagarh face problems

A Correspondent

PANCHAGARH: Most of the primary schools in Panchagarh district are facing enormous problems. Dilapidated class rooms shortage of furniture, scarcity of safe drinking water and lack of sanitary facilities are the common scenes.

All the 310 government primary schools with the exception of a few do not have necessary sanitation facilities. The non-government schools established under the local initiatives are not getting government support although these institutions provide education facilities to large numbers of students.

Students of many government primary schools have to sit either on bricks or mats for want of benches.

Besides, school houses damaged earlier in storms have not been repaired. Classes are thus being taken under the open sky.
