Symposium on Physics

By A Staff Reporter

A five-day symposium on the role of physics in development organised by Bangladesh Physical Society in co-operation with Bangladesh Atomic Energy Commission, Committee on Science and Technology for Developing Countries (COSTED) and Asian Physical Society will begin on Wednesday.

President Abdus Sattar will inaugurate the symposium at the Institute of Engineers at 9 a.m.

The symposium which will cover areas on non-conventional energy, physics in agriculture, medicine and industry, physics of materials and recent advances in physics aims at helping in the identification of research areas and programmes through which the local physicists can take up some of the challenges for development.

A good number of distinguished physicists from USA, UK,
