## Moheskiali College faces problems

Our Correspondent

COX'S BAZAR : The Moheskiali College is facing various problems like shortage of teachers, inadequacy of teaching aids, poor laboratory facilities, absence of hostels and lack of library facilities.

The only college in the Moheskiali Island, it is now being run with only 12 teachers. The post of Vice Principal is yet to be created. There is no teacher in the Department of Biology and as such students of Biology are being deprived of necessary guidance.

As there is no hostel, students, both male and female, have to attend their classes covering long distances on foot.

The College has very little laboratory facilities. Science students of the college are facing much trouble in their practical classes as a result. Due to absence of demonstrators in the Science Department practical classes are not being held as would have been desired.

The College library has a very limited number of books. Moreover, there is no separate reading room. The students also do not get proper sports and games facilities.
