The Asia Development Bank on Tuesday approved a loan of SDR 10.356 million (\$15 million equivalent) to reconstruct and rehabilitate damaged school facilities in Bangladesh.

The interest-free loan, to be drawn from the concessional Asian Development Fund. Carries a service charge of 1 per cent per annum and has a repayment period of 40 years. Including a grace period of 10 years.

The Project aims at reconstructing and providing replacement furniture, equipment and instructional materials for Government primary and secondary (Government and Government-recognised) schools in the Chittagong and Khulna Divisions which were destroyed during the April 1991 cyclone.

The Project will enable students to resume of undertake their studies in permanent and safe facilities, which will be resistant to cyclone winds up to 180 kilometers per hour.

The Project's scope includes the construction of 465 cyclone-resistant rural primary schools and 40 cyclone-resistant buildings for secondary schools in the Chittagong and Khulna Divisions and the provision of furniture, equipment and instructional materials.

The project will restore equitable access to primary and secondary education, especially for girls and rural children whose studies have been interrupted.

The schools to be rebuilt to a higher standard, will be able to withstand cyclones and therefore, disruptions in normal schooling will be lessened. Construction of these schools with shelters will also benefit local communities which can use them as protection centres during cyclones and as emergency relief centres after cyclones.

## PROJECT INFORMATION

The following provides suppliers, contractors, consultants and others with general information concerning the Project. Detailed information may be obtained from the Executing Agency indicated below. The particu-

# ADB approves \$15 million loan to rehabilitate damaged schools in Bangladesh

lars given with respect to "Procurement" are based on present Project planning and may change in the course of Project implementation.
