## 140 Tongi College faces fund constraints

From A Correspondent

TONGI : Fund constraints have led to various problems in the Tongi College.

The number of students is increasing day by day but the college cannot accommodate the students as it could not be expanded due to shortage of funds.

The College has three tin sheds with eight rooms which are too small to accommodate its 900 students. Consequently, their study is greatly hampered as they cannot provided with classrooms. Furnitures in the classroom are also inadequate. The Science Laboratory is not equipped with necessary apparatus for holding practical classes.

The College has no Common room for the students. In absence of such facilities the students face difficulties during their leisure time and they also cannot get any scope for participating in any indoor games.
