LETTERS FROM READERS

Public School

We are glad to know that the National Bank Ltd. has taken a decision to start a Public School to impart better education as well as to help solve the education problem prevailing in the country. The step taken, if not on profit motive, is really praiseworthy. The Nationalised Commercial Banks apart from their own professional roles have got a social commitment to the country. The NCB's can play a vital role for the upliftment of the society remaining sincere in their own profession. Unfortunately, we show very much niggardliness in respect of social upliftment. The Nationalised Commercial Bank can also launch School/College

Technical Schools of their own and can impart better education. It is not possible on the part of the govt alone to take the responsibility of spreading better education spending thousand of crores of taka from the national exchequer. The Establishment of educational institutions by the NCB's will not only beautify the area and build infrastructure but will also help solve the admission problem. The NCB's can also see the profitability of it if they stick to idea of a earning modest sum. The Proposal may be thought over to bring better educational atmosphere in the Country.
