'More military academy wanted'

Congratulation to the Asstt. Prof. M. Zahidul Haque, Bangladesh Agricultural College, Dhaka, for his write up on the above subject published in the Bangladesh Times of March 3, 1989. In this connection I want to state the following:

1) The basic development of a country like ours is primarily founded on the development of agriculture. We see that the developed countries have taken all the care to develop and increase the production of the agricultural products prima facie. Prof. Haque, being a teacher of an agricultural college, ought to have suggested and worked for more agricultural colleges with better system for teaching and production of agriculture, keeping in view the topography and the geography of the country so that the country could move to the industrialisation and thus create

jobs for the people of the country.

2) Within the next ten to fifteen years there will be numerous jobless people in the country, if we should move at the present pace of the development in the field of agriculture and industrialisation.

3) In fact the situation has already been created for the invasion of agriculture technology.
