Arithmetic book of Class VI

One is surprised not to find any comments in any newspaper so far on the above book. The new methods introduced in the book are not even known to some teachers. Besides it is not understood how the Board could approve of these methods for class VI.

I do not find any practical use of these new methods. This seems to be simply an unnecessary burden on the students and Board's demonstration of over smartness. Education Ministry should immediately pay attention to this

before the situation turns to be a national problem
