## **Khulna Medical College students boycott classes**

**Khulna Office**

**KHULNA** Apr. 5 :—The students of newly opened Khulna Medical College have boycotted their classes today as a part of their programmes for realisation of ten-point demand. Their demands include construction of hostel, recognition of the college by the university and construction of permanent college campus.

After boycotting classes the students brought out a procession in support of their demands.

The Khulna Medical College began functioning from the last academic year with 50 students admitted in the first year class.
