## Sufferings of BUET students

I am a student of Bangladesh University of Engineering and Technology (BUET). Our admission test for the session 1985-86 was held on 19.1.86 and all of us who were selected for getting admission into BUET, got ourselves admitted within 16.4.86. What happened afterwards? About a period of eight months has already passed away, but our classes were not resumed. Perhaps, there is no possibility of starting our classes within coming four months too.

In comparison with the students of the same session of different medical colleges

## READERS' LETTERS

and other universities in Bangladesh, we have lagged behind by one year as their classes have already been started long ago. It is evident that when the newly admitted students like us shall resume our classes, the students in medical colleges and other varishies will be promoted to 2nd year. Will not such delay be detrimental to our interest?

Every one knows that the admission test and medical check up which are strictly

required for getting admission into BUET, are very tough and the students who get their admission here, possess a good academic background. But it is a matter of great regret that such students are losing one year for no fault of their own. How can we get ourselves rid of such miserable and puzzling situation? I think that the BUET authority and the government should feel our grievances and frustration sympathetically.
