## Education in Uttara

Recently the Education Secretary announced that six govt. high schools would be established in Dhaka on the model of Govt. Laboratory High School. We appreciate the decision of the government.

Uttara Model Town is becoming one of the most important residential areas of the city. People of different professions like engineers, doctors, educationists and journalists live in this area. But a grave problem for the residents of Uttara is the school/college problem. We are yet to know about the plan of the Government to establish any

school or college in that area. Due to lack of availability of such educational institutions, residents of Uttara Model Town are now facing a serious situation. It is not possible for every guardian to send his children to the educational institutions of the main town. Keeping in view the situation, we demand that a laboratory high school be set up in Uttara. A govt college may also be established there which will generate a lot of benefits for the middle class people of the residential area.
