For a peaceful campus

Students are the responsible citizens of a country to be entrusted with the task of nation building. It is only after acquiring knowledge that the students can fully enter into the political affairs of the nation as the future of the nation takes shape in the political arena. The students like other members of the society have the right to see that the country is developed properly.

Students politics are also there in developed countries but the students of those countries do not make any interruption in normal course of the educational institutions. But in our country it is not so. Terror, violence killings in

the name of students politics are frequent in the campus. Politicians often use students for their own gains, it is alleged. Students are said to strengthen the hands of political parties.

Students may take part in politics but if it is done on a prolonged or permanent basis it will hamper severely their studies and it will be impossible to remove session jam.

Now the time has come to free the campuses from terror violence killings and political instability. For this purpose the government, the campus authority, the student community and guardians should come forward to

work unitedly with sincerity and dedication to restore educational atmosphere in the campuses.
