BUET teachers concern over water withdrawal

By Our DU Correspondent

A meeting of the executive council of the Teachers' Association of Bangladesh University of Engineering and Technology (BUET) was held on Thursday with its President Prof Mohammad Abdur Razzaq Akhand in the chair.

The meeting expressed its grave concern the unilateral withdrawal of Ganges' water by India and creating adverse situation on the Bangladesh economy and environment.

Speakers at the meeting acknowledged the support of India during the country's War of Liberation but said that post-liberation behaviour of India towards Bangladesh was contrary to her initial gesture of friendship.

The meeting urged the leaders of the SAARC countries to realise the importance of the crucial issue and should try to find out an amicable solution to this problem during the ensuing 7th SAARC summit.
