

Metric system

তারিখ ০১/০৬/৮২
পৃষ্ঠা.....

Standards of Weights & Measures Ordinance 1981 has been promulgated on September 12, 1981. This promulgation has made it easy legally for any person or organization or corporation etc. to act now to switch over to metric system.

In Metric System for day-to-day trade "kilogram" will be used for the measurement of weight. Similarly "metre" will be used for the measurement of length and "litre" will be used for the measurement of liquid.

Please make your plan or feasibility report or any work programme in Metric System International.

All Govt. Department Public Sectors Autonomous Organizations etc. should chalkout their metrication programme so that all the provisions of the Ordinance 1981 are smoothly implemented in time.

All consulting firms indentors traders exporters etc. must carryout their work in metric systems.

All manufacturing units either in the public or private sectors should start production and sale in metric system from now on as there is no legal barrier after the promulgation of Standards of Weights & Measures Ordinance 1981.

Almost 500 national standards have been formulated by the Bangladesh Standards Institution. Most of these standards are in Metric System International. Please obtain a copy to-day from BDSI Library if you are a manufacturer consulting firm indentors traders exporters etc. Other National and International Standards in Metric System International are also available in BDSI Library for consultation. These Metric Standards will help you immensely to convert to metric.

If you are a writer of Arithmetic books please obtain Metric System International Units from BDSI and write Arithmetic books in standardized metric system.

If you intend to carry on the business of manufacturing repairing selling or buying any commercial weights or measures or any weighting instrument or measuring instrument please consult the BDSI regarding the standard and quality of the item.
