## Robertson lectures on medical education

By A Staff Reporter

Dr R F Robertson, immediate past President, Royal College of Physicians of Edinburgh and President designate of British Medical Association on Wednesday delivered a lecture on medical education at Bir- demi under the auspices of Bangladesh Medical Association.

While dealing with various aspects of medical education, Dr Robertson remarked that the standard of post-graduate medical education in Bangladesh was quite high and as good as MRCP, FRCS—if not harder.

He also emphasised the need for practical training of undergraduates and continued education for all medical practitioners.

Prof. Nurul Islam, Director I.P.G.M.R, and Chairman, Scientific Committee welcomed the Speaker and introduced to the local physicians. Prof. Islam urged closer ties between the colleges of physicians and the medical associations of the two countries.

Dr. Sayedur Rahman, president, BMA in his presidential address described the role played by BMA in the field of the medical profession, and continued education of the practitioners.
