### Open University Programme

Sir,  
We are very thankful to the government for the opening of the first ever open university in our country and for contemplating to open an independent channel in T.V. for telecasting educational programmes. It is hoped this university will offer development and production oriented education. It's gratifying to note that the government by way of implementation of an egalitarian educational policy, is increasingly laying emphasis on female education, and education for the backward section of the people.

Higher education, has so far been limited to the elitist group. Now it has been made available for the commoners as well. Regarded as a landmark, it is expected that this university will foster healthy emulation among the universities for attaining higher excellence in both academic and research spheres. This university will help eradicate the menace of rumpus from the campus.

We hope that in course of time, educational facilities through audio-

visual devices will be expanded and mass literacy and technical education will be covered under distant educational programme. We hope the open university will prove itself to be a university with a difference.  
Golam Nabi, 1041/Zakir Hussain Road, East Nasirabad, Chittagong
