Workshop on career options in microbiology at DU held

DU Correspondent

A daylong workshop on "career options in microbiology: Bangladesh perspective" was held on Saturday at the Dhaka University Microbiology Department with a view to helping the young graduates in microbiology of different universities of the country.

It was organised by Graduate Microbiologists Association (GMA) in association with the Bangladesh Society of Microbiology (BSM) and the Department of microbiology to dwell on the possible career corridors for the microbiology in the country.

Speakers said that there are immense potentials for the young graduates in the Microbiology sector, which can help them find a better career. They added that the microbiology graduates could work promisingly in cooperation with the Bangladesh Society of Microbiology (BSM) and the Department of Microbiology.

The graduates of microbiology from different universities took part in the workshop.

Prof. A. K. M. Sirajul Islam Khan, Vice-chancellor of Jagannath University inaugurated the workshop as the chief guest while Dr. Akhter M. Molla, Director of Anti-Viral Drug Discovery & Research, Abbott Laboratories, USA was present as the guest speaker.

Distinguished scientists and experts from all relevant sectors were also present as guest speakers and discussants at the workshop.
