Unfortunate developments at BUET

Sir, The members of the 61-Club are deeply concerned at the recent unfortunate developments in their dear alma mater, the BUET. They find no words strong enough to condemn the mindless violence by some students against the teachers. The finest seat of higher learning in the country having age old tradition should not be allowed to become hostage to the indisciplined conduct of some students.

It is the responsibility of all, particularly the government, to uphold the dignity, honour and above all the academic authority of the teachers.

The law should be allowed to take its due course as it is normal in any civil society. Such undesirable and unsolicited incidents are bound to seriously undermine the congenial environment for higher education in the country which this institution has been upholding since its very inception.

The members of the 61-Club sincerely hope that all attempts shall be made by all quarters concerned to prevent such untoward happenings in future.

Engr. Abdur Rahim
General Secretary, 61-Club

and against admission issue on Architecture, something even more excessive than any events in the history of BUET has come up.

Aleya
Florida, USA

What's with BUET?

Sir, What's with BUET? Most renowned Engineering university of Bangladesh now hitting headlines with teachers going after students and students violating teachers. Time has come for a thorough investigation. We as guardians are worried because we can sense a conspiracy eating up the sacred educational institution.

Unpleasant things are surfacing. The most prestigious academic institution has been infected with internal politics. If the conspiracy is true then BUET is in the hand of power hungry academician and what can be worse than that?

Just when we are starting fresh after being exhausted by so many articles written for
